The game is chalky full of content, rich with legends, and has some of the most beautiful hand-drawn graphics I've seen in a game. Sure it's tough, but just because the game is hard dosage doesn't mean it's bad. The same can go along with other challenging games like Dead Cells, Furi and From Software's Game Collection. Individual difficulties in the game were balanced, sometimes it caused randomness, but half the time it was fair. Being careful and learning from your mistakes is the best way to master the game, and the game rewards those who learn overtime. The soundtrack is very good from calm to thrilling. Characters are adorable to encounter, and each area is unique and pops out for players. I spent over 40 In the game, and watching how Team Cherry appears with a physical copy of the game. I strongly urge you to buy the game. This money will help Team Cherry create the Silksong next season, which I'm dying to play. And And what I thought of Hollow Knight, a 10/10 experience.
